The Division of Immunology and Allergy is looking for its new:

**Postdoctoral position**

Projects:

HIV antisense protein (ASP); Molecular mechanisms of HIV hypervariability

The Laboratory of AIDS immunopathogenesis, Division of Immunology and Allergy, CHUV, Lausanne, CH, is recruiting for a postdoctoral position in the Unit of HIV Variability. Areas of investigation include isolation and characterization of HIV antisense protein and assistance in other research projects in the Laboratory.

The optimal candidate must speak English and have less than 1 year of postdoctoral experience. The candidate must be capable of working independently and have established background in HIV biology, molecular biology, biochemistry and cell biology. Basic knowledge of bioinformatics and biostatistics is an asset.

Starting date: **April 30th, 2013** or at the earliest convenience.

Applicants should send their curriculum vitae together with a cover letter and three letters of recommendation to Dr. Cecilia Graziosi Cecilia.Graziosi@chuv.ch

For any additional information please contact: Cecilia.Graziosi@chuv.ch or tel. +41 (0)21 314 1065
