

INFECTIGEN Call for Proposals 2009

INFECTIGEN received 12 proposals for review. After external advise from 20 reviewers (7 national and 13 international), the commission retained 5 proposals for funding:

- The Wastewater Mobilome *VAN DER MEER Jan Roelof (UNIL)*
- Ultra-high throughput sequencing for discovery and characterization of viral genomes in fire ants. *KELLER Laurent (UNIL, UNIGE, International)*
- In-vivo evolution of *S. aureus* dissected at the genome scale. *FRANCOIS Patrice (UNIGE, International)*
- MicroRNA profile and regulation in purified CD4 T cells from HIV-1 infected individuals. *TELENTI Amalio (CHUV, UNIGE, International)*
- Contribution of multiple genetic variants, previously validated in genome-wide analyses, to acute coronary artery events in HIV-infected individuals – An international collaborative study. *TARR Philip (UNIBA, CHUV, SHCS, International)*
